Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8 and 11-13, drawn to a cmp process, classified in class 438, subclass 692.
 - II. Claims 9-10, drawn to a polishing system, classified in class 156, subclass 345.14.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process such as one that does not require polishing a surface with a polishing pad that has regularly spaced flow channel.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
5. During a telephone conversation with Yingsheng Tung on 8/23/2008 a provisional election was made without traverse to prosecute the invention of Group I,

claims 1-8 and 11-13. Affirmation of this election must be made by applicant in replying to this Office action. Claims 9-10 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

DETAILED ACTION

7. This application is in condition for allowance except for the presence of claims to an invention non-elected without traverse. Accordingly, claims 9-10 have been cancelled.

8. Claims 1-8 and 11-13 are allowed.

9. The following is an examiner's statement of reasons for allowance:

As to claims 1-8 and 11-13, the prior art of record taken alone or in combination fails to suggest, teach, or render obvious a chemical mechanical polishing process for removing material from a wafer surface of a semiconductor comprising: providing a polishing recipe, which is based on the topography of the wafer surface, wherein the recipe includes directing a portion of the wafer to reside in a channel-free portion of a polishing pad during a portion of the process.
